PROFILE SUMMARY

Software Engineering student skilled in Full Stack Web Development, Data Structures, and Algorithms. Passionate about building scalable, high-performance applications with real-world impact.

EDUCATION

BS Software-Engineering, *FAST-NUCES, Lahore* 08/2023 – Present | Lahore

ICS-Physics, *Punjab Group of Colleges* 2021 – 2023

SKILLS

Python — Numpy, Pandas & Data Pre-Processing • **C/C++** — Desktop Development & DSA • **Java Development** — Web & Desktop Development • **ReactJs** — FrontEnd Web Development • **ExpressJs** — Backend Web Development • **Database Management** — SQL & MongoDB • **Operating System** — System-Level Programming • **Assembly Language** — Low-Level Programming • **Natural Language Processing** — ANN, RNN, LSTM & Transformers • **Networking** — Transport, Network and Link layer • **LLM Fine Tuning** — Weight Update and Gradient Descent

PROJECTS

APEX, *An AI-assisted career guidance platform* 02/2026 – 05/2026
AI career assistant with skill extraction, roadmap generation, and job matching (Ollama, Selenium)

FAST-Ex, *A buy/sell/exchange platform for university students* 02/2026 – 05/2026
Marketplace with real-time chat, auth (Clerk), AWS S3 storage

Quizify, *Quiz Management System* 02/2025 – 04/2025
Spring Boot quiz system with design patterns (Factory, Singleton, Adapter, Template)

Chattrix, *A Real-Time Chat Application* 06/2025 – 08/2025
It includes secure two-factor authentication and one-on-one chat management using websockets

MBTI CO, *Automated chat-based personality analyst* 03/2026 – 05/2026
Predicts personality evolution from chat data using XLM-RoBERTa. Full AI pipeline with Flask & React.

LogicVerse 10/2025 – 11/2025
Built a scalable application using three-tier architecture (Layered), Java generics, design patterns, and JUnit-based TDD for maintainable development.

AWARDS

2nd Position in RC3 (Speed programming), *Riphah International University* 11/2025

EXPERIENCE

Group Projects 08/2023 – Present

- Engineered 6 full-stack web applications using Agile methods, consistently delivering sprint goals 2 days ahead of schedule.
- Managed version control using Git/GitHub with 50+ merges, ensuring conflict-free integration.

Competitive Programming 2024 – Present

- Solved 90+ algorithmic challenges on LeetCode while improving problem-solving speed by 40% through timed contests.

Full Stack Software Developer, *NETSOL TECHNOLOGIES* 07/2026 – 09/2026

- Completed the 8 week internship at NETSOL technologies as web developer, first time worked on real world applications using springboot
